WORK EXPERIENCE

Software / AI Engineer

Jun 2023 — Present

[Upstage AI](#)

Seoul, Korea

- Building agents that assist users with document-based work in [Upstage AI Space](#)
- Automated qualitative evals for LLMs – integrated AWS ECS/Fargate for scalable runs and built a dashboard to compare scores across benchmarks; enabled team-wide one-click LLM assessment
- Developed a Streamlit-based annotation platform with role-based access control, bulk task assignment, and real-time feedback; enabled construction of a dataset to improve LLM’s information retrieval ability for RAG
- Built the chat backend for the virtual K-pop idol [MAVE](#) – architected FastAPI microservices, implemented a DynamoDB-based user memory for personalization, and deployed fine-tuned LLMs for persona-driven dialogue; served 3,000+ users and 50,000+ interactions during a 3-week global beta
- Automated an insurance evaluation pipeline for Hanwha Life using RAG to expedite underwriting assessments

Data Manager

Apr 2022 — Jun 2023

[Upstage AI](#)

Seoul, Korea

- Developed a Python library to automate OCR data management – implemented a data format converter for OCR and key-value extraction, dataset versioning with automatic split management, and an annotation quality validator; standardized data workflows across teams
- Led a data standardization committee that defined protocols to ensure data consistency and streamlined workflows

AI Researcher

Feb 2021 — Mar 2022

[Silvia Health](#)

Seoul, Korea

- Applied a voice conversion algorithm to extract speaker-independent embeddings for detecting signs of cognitive impairment from speech
- Built an ML backend to predict MMSE (Mini-Mental State Examination) scores from speeches on a mobile app

EDUCATION

Korea Advanced Institute of Science and Technology

Daejeon, Korea

Master's in Knowledge Service Engineering

Aug 2018 — Feb 2021

- Thesis: “Towards Adaptive Sampling of Emotions in the Wild with Active Learning”

Carnegie Mellon University

Pittsburgh, USA

Bachelor of Science in Economics

Aug 2010 — May 2017

- Science and Humanities Scholar, Additional Major in Human-Computer Interaction, Minor in Physics

SELECTED PUBLICATIONS

- [1] Cha, I., Oh, J., [Park, C. Y.](#), Han, J., Lee, H. “Unlocking the tacit knowledge of data work in machine learning” **CHI EA** (2023) [[abs](#)]
- [2] Heo, D., [Park, C. Y.](#), Cheun, J., Ko, M. J. “Separating content from speaker identity in speech for the assessment of cognitive impairments” **arXiv preprint** (2022) [[abs](#)]
- [3] [Park, C. Y.](#) et al. “K-EmoCon, a multimodal sensor dataset for continuous emotion recognition in naturalistic conversations” **Scientific Data, Nature** 7.1 (2020) [[abs](#), [doi](#)]

SKILLS

- **Languages:** Python, JavaScript/TypeScript, Bash, HTML/CSS, Go
- **Backend/Infrastructure:** Docker, Kubernetes (EKS), AWS, GCP, Streamlit
- **Tools & Frameworks:** PyTorch, Git, Unix, React, Tailwind CSS, FastAPI, PostgreSQL
